The same thing is true for the constructors. Even with pass-by-reference semantics, a constructor that always copies the arguments would be bad. -John D. Gregor [1] If we want to get rid of custom constructors and assignators, we need a way of resolving such duplicate symbols. Unfortunately, the only technique that seems to work on non-C++ code is to create a new wrapper that implements the interface of the C++ class (as described in P0179R0 (subclassing)). I have

just gotten the latest SVN trunk of cppunit working in a CMake-generated build. I didn't have to do
