# Pikuniku Download !!BETTER!!] [key Serial]

I've added some great titles to my library in past months, thanks to Twitch, including the time-shifting shooter Superhot and the indie-adventurer Pikuniku. However, not all the games I've downloaded ended up being worth the time or disk space for me. Don't get me wrong, I'm not complaining about free PC games, but I found some titles more engaging than others. Your preference in games will likely differ from mine though, so I've classified each title by genre, added the OpenCritic rating (ranging from zero to 100), and wrote a brief description. If any of the games sound interesting to you, claim them before they expire on Nov. 1. To download these free games, you first need to claim them. To get started, click the crown icon (called Loot) in the upper-right-hand corner of the web interface or desktop app. Then scroll down through the list of in-game items and membership perks until you get to the games with the Free Games with Prime label. Hit the Claim button underneath whatever games interest you and they will appear in the Games section of the Twitch desktop app. Alternatively, you can claim games from the Twitch Prime Loot page (Opens in a new window). Once a game appears in your library, you can download it whenever you want. Previously claimed games can also be downloaded again at any time.
